FUTUREbio

Dear Reader,

This newsletter provides a short summary on our 4th transnational meeting in the beautiful City of Regensburg. The OTH Regensburg hosted 18 dedicated participants from Turkey, Switzerland, Romania, Italy, Finland, and Germany. After a warm welcome, the status of our lecture guidebook was discussed. The first draft in English is almost finished. In addition, first laboratory videos as well as webinars were shared via youtube, VR activities are emerging and field trips as well as workshops were organised. Future activities including student training activities, translations of book chapters and measures for quality control were discussed and planned. On the second day, organizational matters of the project as well as ideas for follow-up projects were discussed, VR applications were tested, and pictures taken. The 4th transnational partner meeting ended with a joint lunch at the OTH Regensburg.
